AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH

Faculty of Science and Technology

Assignment

Assignment Title:	Applying for Jobs with a Cover Letter and CV		
Assignment No:	1	Date of Submission:	4 March 2026
Course Title:	Business Communication		
Course Code:	ENG2103	Section:	H
Semester:	Spring 2025-26	Course Teacher:	Shibaji Mridha

Declaration and Statement of Authorship:

1. I/we hold a copy of this Assignment/Case-Study, which can be produced if the original is lost/damaged.
2. This Assignment/Case-Study is my/our original work and no part of it has been copied from any other student's work or from any other source except where due acknowledgement is made.
3. No part of this Assignment/Case-Study has been written for me/us by any other person except where such collaboration has been authorized by the concerned teacher and is clearly acknowledged in the assignment.
4. I/we have not previously submitted or currently submitting this work for any other course/unit.
5. This work may be reproduced, communicated, compared and archived for the purpose of detecting plagiarism.
6. I/we give permission for a copy of my/our marked work to be retained by the faculty for review and comparison, including review by external examiners.
7. I/we understand that Plagiarism is the presentation of the work, idea or creation of another person as though it is your own. It is a formofcheatingandisaveryseriousacademicoffencethatmayleadtoexpulsionfromtheUniversity. Plagiarized material can be drawn from, and presented in, written, graphic and visual form, including electronic data, and oral presentations. Plagiarism occurs when the origin of their arterial used is not appropriately cited.
8. I/we also understand that enabling plagiarism is the act of assisting or allowing another person to plagiarize or to copy my/our work.

* *Student(s) must complete all details except the faculty use part.*
** Please submit all assignments to your course teacher or the office of the concerned teacher.

Betopia Group

AI Engineer

Application Deadline : 07 Mar 2026

Apply Now | Shortlist | Share:

All | Requirements | Responsibilities | Skills & Expertise | Salary & Benefits | Company Information

Summary

Vacancy: **2**
Salary: **Negotiable**
Age: **22 to 28 years**
Experience: **1 to 2 years**
Location: **Dhaka**
Published: **05 Feb 2026**

Requirements

Education

- Bachelor of Science (BSc) in Computer Science & Engineering

Experience

- 1 to 2 years
- The applicants should have experience in the following business area(s): Group of Companies, IT Enabled Service
- Freshers are also encouraged to apply.

Additional Requirements

- Age 22 to 28 years
- Strong proficiency in Python and AI libraries (e.g., PyTorch, TensorFlow, or Scikit-learn).
- Hands-on experience with AI Automation and connecting AI models via RESTful APIs.
- Familiarity with LLMs (Large Language Models) and prompt engineering techniques.
- Knowledge of databases, including SQL and Vector databases (e.g., Pinecone, Milvus, or ChromaDB).
- Experience in data preprocessing and feature optimization for ML models.
- Working knowledge of Computer Vision for detection and recognition tasks.
- Proficiency with Git and basic model deployment processes (MLOps).

Preferred (Highly Appreciated):

- Experience with workflow automation tools (like n8n) or low-code AI integration.
- Exposure to RAG-heavy systems for legal, government, or healthcare contexts.
- Understanding of local industry needs, such as RMG or Agriculture-based AI solutions.

Responsibilities & Context

Job Context:

- The AI Engineer will be responsible for the development, implementation, and optimization of Betopia Group's artificial intelligence systems and automation workflows.
- This role involves building intelligent solutions that bridge the gap between raw data and business operations, ensuring high standards of accuracy, efficiency, and scalability.
- As we execute our 2026 AI & Automation Roadmap, you will play a key role in integrating AI into various industry-specific projects.

Job Responsibilities:

- Design, develop, and maintain AI Automation workflows to streamline business processes.
- Implement and fine-tune Machine Learning models for predictive analytics, vision-based detection, and behavior learning.
- Build and optimize RAG (Retrieval-Augmented Generation) systems for document-based knowledge retrieval and automated reporting.
- Collaborate with the software team to integrate AI models and APIs into existing web and mobile platforms.
- Optimize AI systems for performance, ensuring low latency and high reliability in production environments.
- Write clean, maintainable, and well-documented Python code for AI microservices.
- Identify, debug, and resolve technical issues in AI pipelines in a timely and efficient manner.
- Participate in research and testing of new AI tools to maintain a competitive edge in the local market.

Skills & Expertise

Computer Vision | Git | Python | PyTorch | ScikitLearn | SQL Database | TensorFlow

Compensation & Other Benefits

- Profit share
- Salary Review: Yearly
- Festival Bonus: 2
- Excellent Work Environment
- Fast Career Growth
- Global Exposure
- Innovation-Driven Culture

COVER LETTER WORKSHEET

Preparation

1. To whom are you sending the letter?

Name (if any):

Title: Hiring Manager

Company, Address: Betopia Group, Level 6, Lotus Kamal Tower-2, 59 & 61, Gulshan South Avenue, Gulshan 1, Dhaka 1212

2. Based on the job announcement key words and what you know about the job, what is the company looking for in a candidate? (What experience, results, skills, approach, and abilities do they need?)

- BSc in CSE with Python and AI library knowledge (PyTorch, TensorFlow)
- Hands-on experience with Computer Vision and AI automation
- Familiarity with REST-based integration and database knowledge (SQL)
- Knowledge of LLMs, prompt engineering, and RAG concepts
- Ability to integrate AI solutions into real-world systems

Opening Paragraph

1. What is the exact title of the job? AI Engineer
2. How did you discover the job was available? (e.g., job board, internet, placement center, professional meeting, referral, person in hiring firm, career fair, recruiter, etc.) BDJobs online posting

   Cite the url: https://bdjobs.com/h/details/1456943?ln=1
3. When was it published? 05 Feb 2026
4. Why are you interested in this particular job and company? (e.g., type of work, location, reputation, opportunities, etc.) I am motivated by Betopia Group's Vision 2030 to engineer a smart technology ecosystem where AI seamlessly converges with real-world applications, and I am excited to contribute to building intelligent systems that empower industries and communities.

Middle Paragraph

1. What do you have that matches those needs? (Experience, education, results, skills, approach, abilities. Please be specific.)

- BSc in Computer Science and Engineering with a 3.88 CGPA, a Silver Award, and four Dean's List honors.
- Strong proficiency in Python, PyTorch, and TensorFlow, with hands-on experience building deep learning models for computer vision and predictive tasks
- Experience designing AI automation systems integrating LLM agents with RESTful APIs, including RAG pipelines using embeddings and vector databases.
- Implementation of multi-agent workflows and real-world API integrations (Telegram, Shopify, webhook-based systems) for business automation
- Consistent use of Git and GitHub for version-controlled development and structured project management

2. Determine the two or three areas that are the highest priority to the company.

- Developing and implementing AI automation workflows
- Integrating AI systems with real-world business operations and digital platforms
- Applying machine learning and intelligent solutions to industry-specific challenges.

Closing Paragraph

1. What is the person expecting you to send? (e.g., resume, letter of interest, salary requirements, references, examples of your work) Resume
2. What do you want to happen after you send the resume? (An interview, a phone call, an email, etc.) An interview opportunity

Hiring Manager
Betopia Group
Dhaka 1212

Dear Hiring Manager,

I am writing to apply for the AI Engineer position at Betopia Group, as advertised on Bdjobs.com on February 5, 2026.

I hold a BSc in Computer Science and Engineering with a 3.88 CGPA and strong proficiency in Python, PyTorch, and TensorFlow. I have developed deep learning models for computer vision and predictive tasks, performing data preprocessing, feature optimization, and model training. In addition, I have designed AI automation systems integrating LLM agents with RESTful APIs, including Retrieval-Augmented Generation (RAG) pipelines using embeddings and vector databases. I have implemented multi-agent workflows and integrated AI systems with Telegram, Shopify, and webhook-based services to automate real-world business processes. Alongside my academic projects, I gained industry experience at Techmak Technology Ltd., where I worked on automation solutions and web development, strengthening my understanding of system integration in operational environments. I consistently use Git and GitHub to manage version-controlled projects and maintain structured development workflows.

I am motivated by Betopia Group's commitment to advancing intelligent digital solutions and AI-driven automation across industries. My experience in AI integration, workflow orchestration, and scalable system design aligns directly with your AI & Automation initiatives.

I would welcome the opportunity to discuss how I can contribute to your team. Thank you for your time and consideration.

Sincerely,

Ahnaf Hasan

PERSONAL STATEMENT

Analytical. **Innovative**. **Collaborative**. Computer Science and Engineering graduate from AIUB with a strong academic foundation in machine learning, and LLM-based system integration. Experienced in developing computer vision models, designing Retrieval-Augmented Generation (RAG) pipelines, and integrating AI systems through RESTful APIs. Committed to building intelligent, scalable solutions that bridge data-driven technologies with real-world business applications.

TECHNICAL SKILLS

Programming & Analytical Skills:

- Python, C++, C#, SQL.
- Strong foundation in Data Structures and Algorithms (DSA) and analytical problem-solving.

Machine Learning & AI:

- PyTorch, TensorFlow, Scikit-learn,
- Deep Learning (CNNs, Vision Transformers - ViT/DeiT),
- Computer Vision.

LLM & AI Systems:

- Retrieval-Augmented Generation (RAG),
- Embeddings & Vector Databases,
- Prompt Engineering,
- Multi-Agent AI Workflows.

System Integration & Web Development:

- REST APIs, Webhooks,
- Next.js, Tailwind CSS,
- Git & GitHub.

Hardware & IoT:

- Arduino, ESP32, sensor integration,
- Firebase/Telegram API integration.

PROFESSIONAL EXPERIENCE

Techmak Technology Ltd.

Dhaka, Bangladesh *Automation & Web Developer (Part-Time)* | [2023 – 2025]

- Worked on automation-based security and surveillance solutions, including the configuration of IP-based systems and access control mechanisms.
- Assisted in the system integration and deployment of industrial automation infrastructure to streamline operational environments.
- Developed and maintained robust web applications to support and optimize day-to-day operational workflows.
- Collaborated closely with technical teams to design, troubleshoot, and implement scalable, automation-driven solutions.

AI & MACHINE LEARNING PROJECTS

Smart Energy Storage Management System (SEMS)

- Designed an AI-driven predictive demand system to forecast energy requirements based on historical data.
- Optimized renewable energy usage and developed intelligent battery scheduling strategies for efficiency.

AI-Powered E-commerce Automation System

- Designed a Telegram-based AI agent seamlessly integrated with Shopify APIs to automate customer interactions.
- Implemented LLM tool-calling capabilities to autonomously handle product queries and streamline order management.
- Built a conversational workflow automation system equipped with contextual memory to enhance user experience.

RAG Agent Using Langflow

- Developed an end-to-end document ingestion and vector search pipeline for automated knowledge retrieval.
- Implemented sophisticated embeddings and retrieval mechanisms utilizing vector databases (such as Astra DB/ChromaDB).
- Designed structured prompt templates to ensure highly accurate, context-aware generation for automated reporting.

SOFTWARE, DATABASE & HARDWARE PROJECTS

Learning Management System (LMS) Database Integration

- Designed comprehensive Entity-Relationship (ER) diagrams and created structured SQL tables for a robust LMS.
- Developed the backend logic and graphical user interface using C# Windows Forms, handling event triggers and seamless UI updates.

Productivity & Tracking Applications

- Created a dynamic task-tracking application featuring a visual Kanban board and integrated completion animations.
- Developed a routine-tracking application with customizable date options to help users manage daily schedules effectively.

Hardware Automation & IoT Systems

- Built a physical password-based switch to control a servo motor utilizing a 555 timer and custom-constructed digital logic gates.
- Engineered digital logic designs including Finite State Machines (FSMs) and frequency calculation circuits.

EDUCATION

Bachelor of Science (BSc) in Computer Science & Engineering

American International University-Bangladesh (AIUB) | 2022 – 2025

- **CGPA:** 3.88

Higher Secondary Certificate (HSC)

Shaheed Ramiz Uddin Cantonment College | 2021

- **GPA:** 5.00

HONORS & AWARDS

- **Silver Award for Academic Excellence:** Recognized for outstanding academic performance at AIUB.
- **Dean's List (4 Times):** Consistently maintained high academic standing across multiple semesters.

LANGUAGE PROFICIENCY

- **Bengali:** Native proficiency
- **English:** Professional proficiency (reading, writing, and speaking)
